Python, FastAPI, React, Firebase Hosting, Google Cloud Run, Cloud SQL (MySQL), SQLAlchemy Core, Docker
 - Built and deployed full-stack production web app for managing personal book collections with OAuth-based authentication and persistent cloud storage
 - Architected cloud-native deployment pipeline using Firebase Hosting → Cloud Run → Cloud SQL with Secret Manager, IAM roles, and Dockerized FastAPI services
 - Migrated backend across multiple architectures (CLI → SPA → Salesforce → MySQL), gaining hands-on experience with schema ownership, API integration, and production infrastructure
- **Agentic RAG – Document & Web Automation System**
Python, FastAPI, LangChain, Qdrant, Playwright, SentenceTransformers, Pytesseract
 - Architected hybrid AI system routing between document analysis and real-time web automation using LLM orchestration and rule-based decision logic
 - Deployed multi-modal processor for PDFs, DOCX, PPTX, and EML with OCR, achieving 95%+ task accuracy
 - Optimized semantic caching, reducing query response time by 80% while maintaining vector search precision
- **tempLLM – Browser-Bridged LLM API**
Python, FastAPI, Node.js, Playwright, Chrome DevTools Protocol (CDP)
 - Published npm CLI tool bridging free browser LLM sessions to a local REST API via CDP, removing API key costs
 - Engineered FastAPI backend with streaming SSE, session management, and dual connection modes (CDP + headless Playwright) across Linux, macOS, and Windows
